## Beschreibung

---

Grade QMA Quartz Filter, circle, 37 mm Grade QMA circles Highpurity quartz (SiO<sub>2</sub>) microfiber filters are used for air sampling in acidic gases, stacks, flues and aerosols, particularly at high temperatures up to 500° C and in PM10 testing. Because of the low level of alkaline earth metals, "artifact" products of sulfates and nitrates (from SO<sub>2</sub> and NO<sub>2</sub>) are virtually eliminated. QMA, sequentially numbered according to EPA standards, is suitable for most applications.

## Zusätzliche Informationen

---

Art.-Nr.	VL-2603
Hersteller (Marke)	Whatman
VGKL Nummer	250251037
Transporttemperatur	Raumtemperatur
