Description

The PTFE safety cover provides even more safety for any application with a Heat-On insert. Despite reduced danger when using Heat-On attachments compared to a conventional heating bath, the risk of burns is not zero. That is why we recommend the use of a safety cover made of chemical-resistant and easy-to-clean PTFE. This safety cover is only suitable for the Multi-Well holder, which encloses the Heat-On inserts. Also available for other Heat-On sizes.
