Shipping

Product Images

Description

- 2 mounting brackets with foldable patient seat, for self-assembly on the wheelchair scale KERN MWA 300K-1M, factory option, please order when ordering the scale, a subsequent assembly is not possible
- Due to the two practical mounting brackets with the integrated foldable patient seat, the wheelchair scale KERN MWA 300K-1M can be transformed into a multifunctional scale in just a few steps. This way patients can be weighed standing free, leaning on the grab rail or comfortably in a seated position. If the patient seat is folded upwards, the scales can be driven on with a wheelchair. The strut bar included in the scope of delivery ensures high stability and torsional rigidity. The drive-through protection for the front wheels of the wheelchair, which is also standard, provides extra safety
- **Material:**
- Overall dimensions W×D×H 470×310×460 mm
