Product Images

Description

Flexible protection for all cases!

Universally usable protective shield made of 3 mm thick Makrolon in two sizes, which can be aligned in the desired position by means of a flexible but strong holding arm.

A simple and proven principle.

The holding arm is attached to a magnetic base, which - depending on requirements - is attached directly to the device or to the separately available stand plate.

The protective shield can thus be easily attached in any desired position.

Length of the holding arm: 35 cm

Accessories: Stand plate (Order noNo. 2-2290)

Additional Information
