Description

- Accurate measuring results require stable working conditions!
- The KERN YPS-03 weighing table is designed to absorb shocks and vibrations that would otherwise falsify the weighing results
- The weighing table KERN YPS-03 consists of:
 - - a 34 kg polished granite stone plate, supported on absorbing rubber elements, which serves as a base for the analytical balance
 - - a work table, whose worktop encloses the stone plate and offers many storage possibilities. The sturdy, powder-coated steel frame has four height-adjustable feet, which can be used to precisely level the weighing table in the event of any unevenness in the floor
- Work can be carried out at the weighing table in an ergonomically optimized manner, either standing up or comfortably seated. The inlet at the front of the table provides enough space for a seat and the operator of the scale without touching the weighing table
- All surfaces are easy and hygienic to clean
- Suitable for all KERN analytical balances $\geq W \times D 270 \times 410$ mm
- Dimensions granite plate $W \times D \times H 270 \times 410 \times 115$ mm
- Overall dimensions $W \times D \times H 768 \times 648 \times 800$ mm (height adjustable)
- Net weight approx. 62 kg
