Product Images

Description

The SERVAGel™ Neutral pH 7.4 Gradient Finishing Gel has all the advantages of SERVAGel™ Neutral pH 7.4 , but has even better resolution (from 5 kDa up to approximately 100 kDa) when separating low molecular weight proteins. The separation range is from 5 kDa up to 200 kDa. To improve the resolution and separation sharpness of protein bands, SERVA Tris-Tricin running buffer and Tris-Tricin/SDS sample buffer should be used.

Additional Information

No.	SV-0121
Manufacturer (Brand)	SERVA
EAN	4058072372583
Transport temperature	Wet ice
Number of wells	15
Thickness	1 mm
