Product Images

Description

The SERVAGel™ TG PRIME™ 8 - 16 % ready-to-use gel has a proprietary modified Tris/glycine buffer system that not only guarantees a significantly extended shelf life compared to classical Tris/glycine gels according to Laemmli, but also allows short electrophoresis times when using standard Tris/glycine sample and run buffers (2 gels, 35 min at 350 V const.). It can be used under native and denaturing conditions. The separation range is from 20 up to 250 kDa.

Additional Information

No.	SV-0168
Manufacturer (Brand)	SERVA
EAN	4058072373054
Transport temperature	Wet ice
Number of wells	15
Thickness	1 mm
