Shipping

Product Images

Description

The SERVAGel™ TG PRIME™ 14 % ready-to-use gel has an in-house developed modified Tris/glycine buffer system, which not only guarantees a significantly extended shelf life compared to classical Tris/glycine gels according to Laemmli, but also allows short electrophoresis times when using standard Tris/glycine sample and run buffers (2 gels, 35 min at 250 V const.). It can be used under native and denaturing conditions. The separation range is from 10 up to 100 kDa.

Additional Information

No.	SV-0138
Manufacturer (Brand)	SERVA
EAN	4058072372750
Transport temperature	Wet ice
Number of wells	10
Thickness	1 mm
