## Description

---

The loadable with a holding capacity of up to 12 bottles (image similar) The Reax 20 is an optimal shaker for processing and storing samples that tend to sediment. Applications range from environmental technology and paint processing to quality assurance in the materials industry. The maximum permissible intake weight is 30 kg, so that even samples with a high solids content are mixed properly. Since large forces are set in motion with this device, it is equipped with an emergency stop switch for your safety. This overhead shaker can be ordered with either a holding capacity for 4 , 8 or 12 bottles. Also suitable for mixing cylinders or wide neck bottles.

## Additional Information

---
