KERN Industrial scale IOC, 3 kg | 6 kg

**Price on
request
plus VAT &
Shipping**

Product Images

Description

- Industry 4.0: A wide range of (optional) data interfaces enables convenient transfer of weighing data to tablets, laptops, PCs, networks, smartphones, printers, etc.
- High mobility: Thanks to battery operation (optional) and compact, lightweight design, suitable for use at multiple locations (lab, production, quality testing, order picking, etc.)
- Level bubble and foot screws for precise leveling of the scale as standard, thus most accurate weighing results
- Platform:
- Stainless steel weighing plate, steel painted base, silicone coated aluminum load cell, dust and splash water protection IP65
- Interrogation and remote control of the scale via external control devices or computer by means of KERN Communication Protocol (KCP). The KCP is a standardized interface command set for KERN scales and other instruments that allows retrieval and control of all relevant parameters and instrument functions. KERN instruments with KCP can thus be easily connected to computers, industrial control systems and other digital systems. The KCP protocol is largely compatible with the MT-SICS protocol. Only possible via data interface RS-232, other interfaces on request

Possibilities for interfaces:

- RS-232 (standard)
- LAN or USB-for-USB-stick (export alibi data) or WLAN or Bluetooth or USB-for-PC
- Traffic light

Additional Information

No.	KP-4514
Manufacturer (Brand)	KERN
EAN	4058072141295
Transport temperature	Room temperature
Color	light gray/dark gray
Readability	1 g
Operation via	Membrane keypad
Energy supply	Power grid
Manufacturer	CORE
Material weighing plate	Stainless steel
Type scale	Industrial scale
Weighing range MAX	6 kg
