Shipping

Product Images

Description

Shore A, 0 and D for hardness determination of plastics by penetration measurement Shore A Rubber, elastomers, neoprene, silicone, vinyl, soft plastics, felt, leather and similar materials Shore 0 Foams, sponges Shore D Plastics, resin, formica, epoxy, plexiglass etc. Delivery in robust carrying case Recommended especially for internal comparison measurements. Standard calibrations e.g. according to DIN 7619-1 are often not possible due to very narrow standard tolerances Mountable on test stands TI-ACL (for Shore A and A0), TI-DL (for Shore D) to improve measurement uncertainty Large display with backlighting Selectable: AUTO-OFF function or continuous operation, battery level indicator Hardness comparison plates see and

Additional Information

No.	KP-4353
Manufacturer (Brand)	KERN
EAN	4058072139810
Transport temperature	Room temperature
Manufacturer	CORE
