

neoLab® Digital radio clock

Product Images

Description

The neoLab radio-controlled clock in digital design offers high clarity thanks to the large display. The radio clock works via the DCF signal with the highest accuracy. If you are in a European country outside the DCF range, manual setting is also possible. Additional functions such as display of the calendar week, second time, alarm, snooze function and display of the indoor temperature round off the functionality of the radio-controlled wall clock.

- **2-4570:** Accurate time with weekday, 258 x 30 x 212 mm

Additional Information

No.	2-4570
Manufacturer (Brand)	neoLab
EAN	4058072156305
Color	Weiß
Material	Acrylnitril-Butadien-Styrol (ABS)
Display (reading, setting)	digital
Functionality	elektronisch
Type watch	Wanduhr
