Product Images

Description

The **neoLab weighing buckets with shuttle function** are a unique economical solution that combines the function of a bucket and a weighing shuttle in one product. The weighing process has been streamlined, now you can simply scan or remove the material in the bucket and place it directly on the scale.

This eliminates the need for a weigh boat or weighing paper, and saves you valuable lab space. Made of anti-static polystyrene that is water resistant and reduces the likelihood of materials sticking to the scoop

Additional Information

No.	2-6642
Manufacturer (Brand)	neoLab
EAN	4058072155995
Transport temperature	Room temperature
autoclavable at 121°C	No
Color	White
Material	Polystyrene (PS)
sterile	No
Wide	90 mm
Form	pear-shaped
Length	127 mm
Spoon properties	with handle
