**Shipping**

### Product Images

## Description

---

The right choice of the appropriate stirring tool is crucial for an optimal mixing of a medium. Whether viscous or thin-bodied solutions, whether suspensions or aggressive liquids, the high-quality stirring tools from Heidolph ensure perfect flow and thus cover all ranges.

If the vessel size and the positioning of the stirring tool are perfectly matched, you will achieve optimum mixing results.

The high-quality **Visco-Jet stirring tools** are based on the **cone principle**.

The special shape of the stirring blades creates a so-called nozzle effect.

This makes it possible to mix media that cannot be mixed with conventional stirring blades.

## Additional Information

---

No.	BH-1423
Manufacturer (Brand)	Heidolph
old neoLab article no.	2-0589
EAN	4058072195854
Transport temperature	Room temperature
DM Head	120 mm
Shape stirring blade/blade	3-fold. horizontal. rigid
Material stirring head	Polyoxymethylene (POM)
Type stirring head	VISCO JET 3 round nozzles
for DM rod	10 mm
