Description

The **Distriman®** is a direct-displacement pipette for multiple pipetting of the same solution volume.

Only 3 different **DistriTips®** tips are sufficient to cover a volume range from 1 µl to 1.25 ml. At least 100 times dispensing of the same sample volume is possible.

The volume to be pipetted is set on the **Distriman®** in the same way as the **DistriTip®** model, so the correct volume is always pipetted with absolute reliability.

Example: with a **DistriTip®** type Micro (125 µl) you can pipette a volume of 2.8 µl up to 42 times.

Accessories: **DistriTips** (order no. 7-4381 to 7-4386)
