Description

With epT.I.P.S.®-, the original Eppendorf "Totally Integrated Pipetting System"-, the tips are optimally matched to the Eppendorf pipettes and, of course, also meet the requirements of EN ISO 8655. This results in minimal attachment and ejection forces with maximum tightness. epT.I.P.S. pipette tips can also be used with pipettes from other manufacturers. Optimal wetting properties, high transparency and special, certified purity grades are the visible expression of our product and production philosophy. The epT.I.P.S. Reloads PCR clean are high-quality original Eppendorf pipette tips in refill trays and part of the refill system - box and reload. The refill trays are autoclavable. They are available for volumes from 10 µL to 2.5 mL.

Additional Information

| | |
|---|--|
| No. | VB-0179 |
| Article - USP | Less waste compared to disposable racks The refill trays are autoclavable at up to 121 °C in the packaging and without film for later use Depending on the tip size, the trays in the refill system are placed against each other or over each other |
