Description

With epT.I.P.S.®, the original Eppendorf "Totally Integrated Pipetting System"-, the tips are optimally matched to the Eppendorf pipettes and, of course, also meet the requirements of EN ISO 8655. This results in minimal attachment and ejection forces with maximum tightness. epT.I.P.S. pipette tips can also be used with pipettes from other manufacturers. Optimal wetting properties, high transparency and special, certified purity grades are the visible expression of our product and production philosophy. epT.I.P.S. Singles are individually packaged tips in the most comprehensive purity grade Eppendorf Biopur. These tips are available for volumes of 20 µL, 200 µL and 1,000 µL.

Additional Information
