Description

Aluminum blocks for temperature control of reaction tubes and PCR tubes.

- easy processing with multichannel pipettes
- also suitable for 96-hole microplates as well as 8- and 12-well strips
- small space requirement
- fits on any ice bath, in common water baths or on heating plates
- optimal for all temperature-critical work such as PCR
- extremely fast cooling, long cooling effect.
- Use pre-cooled or pre-warmed, even without pre-tempering
- even temperature distribution
- special shape of the holes for optimal heat exchange and avoidance of sample loss due to falling out
- compact arrangement of the samples allows one-hand operation even of screw caps
- for all reaction tubes/PCR tubes of the most important suppliers
- low-priced special designs on request
