neolabLine Superabsorbent 20 g in water-soluble bags

€96.50
plus VAT &
Shipping

Product Images

Description

The **neoLabLine superabsorbers** are ideally suited for laboratories where liquid waste is generated. Superabsorbers can absorb a multiple of liquids within a few minutes. The resulting hydrogel can then be disposed of with household waste (with approx. 5% residual water). **Since the residual waste is usually incinerated, this eliminates the need for liquid handling, transport and autoclaving of liquids of concern.**

The neoLabLine superabsorbers are thus the ideal solution for both working with and transporting contaminated liquid waste. The little helpers are therefore at home in cell culture, microbiology and chemistry laboratories as well as in doctors' surgeries, hospitals and when shipping medical samples and products.

- Packed in convenient water-soluble sachets
- 20 g binds approx. 2 liters of water

Additional Information

No.	2-0899
Manufacturer (Brand)	neoLabLine
EAN	4058072189273
Wide	32 mm
Length	125 mm
Weight	0.02 kg
Medium/ Consistency	Granules
bottled in	Bag
