### Product Images

## Description

---

neoLab Bad Stabil® is a water bath stabilizer to prevent the formation of algae, bacteria and mold in water baths and thermostat circuits. Bad Stabil® has a bactericidal and fungicidal effect. A blue indicator shows the effectiveness. If the blue color disappears, the water bath solution must be prepared again. Due to a low application concentration of only 0.1 %, one bottle of Bad Stabil® water bath stabilizer is sufficient for 100 l bath liquid.

### Note

Heat the solution to max. 70°C; at higher temperatures, the active ingredients boil off. The boiling point is 100°C.

## Additional Information

---

No.	1-6095
Manufacturer (Brand)	neoLabLine
EAN	4058072036614
Volume	100 ml
Detergent properties	with color indicator for bath changelfungicide bactericide
acts against	Algae bacteria molds
