Description

DURAN cylinders with round bottom, for jacketed vessels, without pressure, Ø 65 mm discontinued item DURAN cylinders with round bottom are convincing due to their good wall thickness distribution and enable the cost-effective production of reaction vessels with reproducible geometry. For pressure resistance please refer to our notes in the technical appendix of the laboratory glassware catalog. For glass articles which deviate from the original shape due to further processing, the permissible operating data must be determined in accordance with the technical rules and regulations. Special properties and advantages: For jacketed vessels Rim blown off Component for further processing into reaction vessels Cost-effective production of reaction vessels with reproducible geometry Glass articles for further processing Application: For processing as reaction vessels

Additional Information

No.	SD-0165
Manufacturer (Brand)	DURAN
VGKL number	112102737
Transport temperature	Room temperature
