Product Images

Description

It is important to set the correct emissivity and reflected temperature in the thermal imaging camera to produce accurate thermal images. Until now, this was rather cumbersome. Determining and setting emissivity and reflected temperature is much easier with the testo ?-Marker reference sticker. Attach the sticker to the object to be measured - and your infrared camera with the testo ? assist function recognizes the sticker, determines the emissivity and the reflected temperature, and sets both values automatically.

Additional Information

No.	TO-0387
Manufacturer (Brand)	Testo
Transport temperature	Room temperature
