## DURAN® micro-immersion filter for reverse filtration, 10 mm, POR.1

**€325.80**  
**plus VAT &**  
**Shipping**

### Product Images

## Description

---

DURAN® micro-immersion filter, porosity 1 Filtrations are possible in a variety of ways. One filtration variant at reduced pressure is clarification filtration, in which larger quantities of liquid are to be filtered. In this method, the precipitate is allowed to settle and the liquid above it is drawn off through an immersion filter. This way, hardly any filter cake can form, which could clog the filter and reduce the filtration speed. Special features and advantages: For reverse filtration The recovery of the clear filtrate (not the solids content) is in the foreground Burned-in and therefore permanently durable white print Application: clarification filtration, The recovery of the clear filtrate (not the solids content) is in the foreground, filtration at reduced pressure, qualitative analysis and preparative chemistry, filtration

## Additional Information

---

No.	SD-1920
Manufacturer (Brand)	DURAN
VGKL number	112585711
Transport temperature	Room temperature
