

Thermo Scientific Orion Potassium Electrodes

Product Images

Description

Orion Potassium Electrodes The Thermo Scientific Orion 9319BN and Orion 9719BNWP Ionplus potassium electrodes make it easy, accurate and cost-effective to determine potassium in aqueous solution. Connection types: BNC connector Description: half-cell electrode for potassium with BNC connector Deviation: drift-free potentials Diaphragm: Sure-flow free-flow diaphragm provides stability For use with (instruments): ISE meters Type: Ion selective combination electrode Unit Size: Each

Additional Information

No.	LD-2957
Manufacturer (Brand)	Thermo Scientific
