

Thermo Scientific Orion Silver/Sulfide Electrodes

Product Images

Description

Orion Silver/Sulfide Electrodes Thermo Scientific Orion silver/sulfide electrodes can be used to determine silver and sulfide ions in aqueous solution. Connection types: Waterproof BNC Description: Ionplus Sure-Flow solid-state combination electrode with WPBNC Deviation: drift-free potentials Diaphragm: free-flow diaphragm provides stability Length (metric) Cable: 1m For use with (instruments): ISE meters Operating temperature (metric): 0 ° to 80 °C Type: Ion selective combination electrode, waterproof BNC connector Unit Size: Each

Additional Information

No.	LD-3028
Manufacturer (Brand)	Thermo Scientific
