Fritsch® Rotor P-15 chrome-free steel with set of stator blades

€1,977.00
plus VAT &
Shipping

Product Images

Description

gently comminutes the sample by a pure cutting action. The rotor made of chromium-free tool steel is particularly recommended for sample preparation according to RoHS and WEEE (e.g. for the detection of hexavalent chromium) and for XRF analysis. For all other applications, the rotor made of tool steel can be used, which is harder and thus more resistant to abrasion.

Additional Information

No.	FR-0135
Manufacturer (Brand)	Fritsch
Transport temperature	Room temperature
