## Description

---

Sieve cassettes 10 mm square hole 316L stainless steel Sieve cassettes determine the final fineness of the sample. Sieve cassettes with square hole are recommended for fast comminution of brittle materials to achieve medium fineness within a narrow grain width band. Sieve cassettes with trapezoidal hole are also offered. Sieve cassettes with trapezoidal perforations provide additional size reduction through increased shearing action. Sieve cassettes also available in other perforations.

## Additional Information

---

No.	FR-0969
Manufacturer (Brand)	Fritsch
Transport temperature	Room temperature
