

Systec® steam/air mixture process

Product Images

Description

Steam/air mixture process for model series: HX for sterilization of liquids in closed, pressure-sensitive containers. Prevents deformation of the container due to internal pressure during sterilization. Rapid re-cooling not included. For Systec HX-210 to Systec HX-1580. Two centrifugal fans are included. Rapid re-cooling and Ultracooler are not included.

Additional Information

No.	SX-0481
Manufacturer (Brand)	Systec
