Product Images

Description

Stirring up to 20 liters without heating Based on our proven magnetic stirrer series with heating function, the Hei-PLATE Mix 20 I was specially developed for applications with thermolabile substances. This is because this model has no heating, and the heat from the motor is also not transferred to the installation surface. The Hei-PLATE Mix 20 I magnetic stirrer without heating function is ideal for applications up to 20 liters and can gently stir your solution in a speed range of 100 – 1,400 rpm. In addition, the speed is gently brought to the desired value by a soft start. This prevents splashing, uneven start-up or even jumping of the stirring rod. The patented Kera-Disk® installation surface made of aluminum with ceramic coating is chemical-resistant, scratch-resistant and has a diameter of 145 mm. This unique size makes it suitable for the use of many accessories and samples on a small footprint.

Additional Information

No.	BH-2741
Manufacturer (Brand)	Heidolph
Transport temperature	Room temperature
