€146.75
plus VAT &
Shipping

Description

Drum pump PP with flexible discharge hose made of PVC, length 1.2 m and stopcock. Barrel pumps made of polypropylene enable fast filling of liquids from barrels, canisters and tanks. Due to the good chemical resistance of PP, acids, alkalis and aggressive cleaners can also be filled. The deep bottom check valve of the barrel pump and the continuously adjustable immersion depth by means of the barrel screw connection ensure good residual emptying. The barrel screw connection secures the barrel pump in the barrel. Barrel screw connections and thread adapters for commercially available containers are available as accessories. Seals made of PTFE Immersion tube Ø 32 mm Delivery rate up to approx. 12 l/min For drums and tanks from 30-1000 liters Attention! "List of chemical resistances" must be observed!

Additional Information

No.	KL-1067
Manufacturer (Brand)	Bürkle
VGKL number	290521002
Transport temperature	Room temperature
