### Description

---

With the mini surface thermometer from Testo, you are ideally equipped if you want to carry out temperature checks on surfaces. With its particularly wide measuring tip, it can be easily placed on the smooth surface. For fast measurement results, we recommend our silicone thermal paste (optional). It ensures optimum heat transfer between the measuring tip and the measured object. What the mini surface thermometer can do The mini surface thermometer has a very wide range of applications and can be used for a wide variety of surface temperature measurements: e.g. for temperature checks in the heating and plumbing sector or in air conditioning/cooling and ventilation technology. In addition to its practical size (length of the probe tube 120 mm), it owes its wide range of applications to

its large measuring range. Because with the mini surface thermometer you can measure temperatures from -50 to +300 °C. The digital display shows the result of your surface temperature measurement clearly visible. You can choose between °C and °F for the displayed unit. The handling of the mini surface thermometer could hardly be easier.

## Additional Information

No.	TO-0499
Manufacturer (Brand)	Testo
