

Bürkle® UniSampler EX, complete

Product Images

Description

The sampler has been specially developed for sampling flammable liquids of hazard class AI (VbF, e.g. gasoline). Glass bottle and hose are electrically conductively connected and grounded via a ground cable. Sampler for liquid samples from exactly predetermined depth, with hand vacuum pump. Sampling by vacuum pump has the advantage that the liquid is only in contact with the suction hose and the original sample bottle. Complete in handy carrying case incl. 4 m hose (NBR), glass bottle 1000 ml, bottle adapter, bottle base, vacuum pump, grounding cable and hose weight made of brass PTB approval D-333-009 618/00 The UniSampler "Ex" was developed in cooperation with the Gütegemeinschaft Tankschutz e.V..
