Description

Electric lift LIFT 240, First electric lift in compact design!, More and more laboratory work is taking place in the fume hood. However, it is often a tight squeeze here. Therefore, in the new electric "Lift 240" from BOCHEM, motor and control are integrated in the lift. Absolutely stable when standing and wobble-free when lifting and lowering, it offers perfect safety. The extremely robust, high-precision scissor technology made of 18/10 steel and the electronic components are permanently protected by a bellows made of chemical-resistant PTFE. And because every fume hood is only really safe when it remains closed, a remote control unit operates the lift! The electric "Lift 240" is identical in construction to the mechanical lift 240 x 240 mm from BOCHEM. Both versions can therefore be used and exchanged in existing superstructures as desired. An end stop can be manually adjusted on the outside. Features: Dimensions, retracted (LxWxH): 240 x 240 x 120 mm Height max: 300 mm Working surface (LxW): 240 x 240 mm Weight: 6 kg Lifting speed: 480 mm/min Lifting travel scissors max: 180 mm Load capacity max (dynamic): 25 kg Nominal torque: 8 Nm Protection class: IP 30 Supply voltage transformer: 100-240 VAC, 50/60 Hz Power output: 12 V Battery remote control: 3 V, lithium cell CR2430 Permissible ambient temperature: 5 - 45°C Noise emission: < 80 dB (A) Material work surface: 18/10 steel Material housing: 18/10 steel Material bellows: PTFE

Additional Information

No.	MN-0093
Manufacturer (Brand)	Bochem
VGKL number	100511220
Transport temperature	Room temperature
