Description

KECK™ conical ground joint clamp, nickel-plated, KCM, NS 29 For applications under very high temperatures, the KECK™ ground joint clamps made of nickel-plated spring steel are an important supplement to KECK™ conical ground joint clamps made of POM (polyoxymethylene). Compared to conventional wire clamps, they can be easily and securely applied and are dimensionally stable. Special features and advantages: Easy and safe to put on and are dimensionally stable Good dimensional stability compared to conventional wire clamps Application: For applications under very high temperatures, securing of conical ground joints

Additional Information

No.	SD-2327
Manufacturer (Brand)	DURAN
Transport temperature	Room temperature
