Product Images

Description

This special glass with extra-planar base and rim is used to determine the **fogging behavior of organic materials**. Fogging is the condensation of volatile components from various materials. This special method can also be used to determine the fogging behavior of **liquid, paste and solid raw materials** from which the materials are made.

Available in:

Color: transparent

Additional Information

No.	BR-0544
Manufacturer (Brand)	Rettberg
old neoLab article no.	3-3300
EAN	4058072218485
Transport temperature	Room temperature
diameter	90 mm
Color	transparent (clear)
Material	Borosilicate glass
Height	190 mm
