Product Images

Description

Whirl-Pak® bags made of PE with labeling field and filter

The bags have a filter layer made of finely perforated polyethylene to separate the liquid and solids so that the sample can be pipetted easily. The filter is enclosed within the perimeter of the bag on the sides and bottom so that the sample can be placed in the bag on either side. The liquid is transferred through the filter, but the solids remain on one side.

Additional Information

No.	1-7154
Manufacturer (Brand)	Whirl Pak
EAN	4058072154974
