## Description

---

The CellCamper® Maxi is a cooling box for the safe transport of cells without the use of ice or other energy sources. Special cooling units covering different temperature ranges (0 to +4°C / -20 to 0°C / -22 to -18°C) allow temperatures to be maintained between 5 and 14 hours. As an alternative to the cooling units, use with dry ice is also possible. The CellCamper® Maxi is delivered with two cooling units and a universal box made of aluminum, which can easily be exchanged for two aluminum blocks. A practical carrying strap facilitates the transport of cells over longer distances. The design of the CellCamper® Maxi prevents the cells to be transported from falling over and ensures a safer and more controlled transport than previous solutions. In case of soiling or contamination, CellCamper® Maxi can be easily cleaned with alcohol.

### Scope of delivery:

- CellCamper® Maxi
- Carrying strap
- Universal box made of aluminum for different vessels
- 2 x cooling unit Frozen (2-3717) -20 to 0°C up to 12 hours

**Additional cooling units and aluminum blocks are available as accessories.**

**To use 2 aluminum blocks, please remove the aluminum box.**

# Additional Information

No.	2-3711
Manufacturer (Brand)	CellCamper
EAN	4058072089993
Transport temperature	Room temperature
Color	light green
Material	Polyurethane (PU)
Wide	210 mm
Form	rectangular
Height	205 mm
Length	276 mm
Temperature holding time	-20°C to 0°C for 12 hours
Depth	276 mm
Cryogenic container features	with integrated refrigerant with defined cooling rate with closure/lid insulating for different vessel types/volumes fillable
Capacity	variable (depending on vessel volume)
Refrigerant medium	Ice Dry ice
for type (micro) vessel	Cryotube
suitable for cooling in	Ultra Deep Freezer Refrigerator Freezer/ Freezer
