## Description

---

The CellCamper® Midi is a cooling box for the safe transport of cells without the use of ice or other energy sources. Special cooling units covering different temperature ranges (0 to +4°C / -20 to 0°C / -22 to -18°C) allow temperatures to be maintained between 5 and 14 hours. As an alternative to the cooling units, use with dry ice is also possible. The supplied aluminum block provides space for 30 reaction vessels with 1.5 / 2.0 ml volume and has a temperature scale for control. The design of the CellCamper® Midi prevents the cells to be transported from falling over and ensures a safer and more controlled transport than previous solutions. In case of soiling or contamination, the CellCamper® Midi can be easily cleaned with alcohol .

### Scope of delivery:

- CellCamper® Midi
- Aluminum block with temperature scale for 30 x 1.5 / 2.0 ml
- Cooling unit Cool (2-3716) 0 to +4°C up to 14 hours

**Additional cooling units and aluminum blocks are available as accessories.**

## Additional Information

No.	2-3713
Manufacturer (Brand)	CellCamper
EAN	4058072090012
Transport temperature	Room temperature
Color	light green
Material	Polyurethane (PU)
Wide	210 mm
Form	rectangular
Height	205 mm
Length	138 mm
Temperature holding time	0 to 4 °C for 14 hours
Depth	138 mm
Refrigerant medium	Ice Dry ice
Cryogenic container features	with integrated refrigerant with removable grid insert with defined cooling rate with closure/lid with grid insert insulating for different vessel types/volumes fillable
for vessels with DM up to	11.0 mm
for vessels with volume up to	2 ml
for type (micro) vessel	Reaction vessels
suitable for cooling in	Ultra Deep Freezer Refrigerator Freezer/ Freezer
