neolab® anesthesia chamber

€595.40
plus VAT &
Shipping

Product Images

Description

Inhalation anesthesia chamber for small laboratory animals.

The animals can be observed during anesthesia through the transparent acrylic hinged lid.

All other parts are made of polypropylene and are compatible with anesthetic preparations.

The anesthetic is poured through the small funnel and runs into the wadding lined bottom under a perforated and removable bottom insert. Fresh air can be supplied through the side valve to protect against suffocation.

Overall height : 197 mm,

Inner height: 127 mm from perforated insert to top edge

Depth: 57 mm from insert to bottom of container

Inner diameter: 197 mm (largest)
