Description

Watch glass dish, soda-lime glass, Ø 80 mm The multitude of different work steps in the laboratory environment demands a variety of universally applicable glassware. These glassware devices usually have a rather simple shape and are characterized by their versatility. Watch glasses, for example, are concavely curved. The small trough thus created allows liquids or solids to be poured in. Special features and advantages: Reduced risk of injury due to fused rim Application: Weighing, covering, pre-sampling, drying of materials, Available in Boro 3.3 or soda-lime glass
