## Description

---

Front and sleeves made of high-risk fiber, liquid-tight and breathable. Back made of very air-permeable non-woven fabric.

Arm elastic and tie belt. Generous cut.

Inside skin-friendly, no electrostatic charge, does not stick to the body

Ideal for long term use in wet areas such as sculleries when maximum breathability is required.

Also suitable for medical personnel who come into daily contact with blood and other body fluids that transmit disease. This gown was developed for infection prevention due to increasing epidemics and offers high cost effectiveness in addition to safe protection.

Tested according to EN14126.

Fulfills barrier function against liquids.
