Description

Paperback, 2nd revised edition, 2013, Author Uwe Böhme

Metals, semimetals, salts, non-metal compounds without carbon or complex systems: These substances have their home in inorganic chemistry. Here you will learn everything worth knowing about water and about other elements of the main and subgroups of the periodic table. The book is rounded off with an introduction to common analytical methods, complex compounds and various models. 370 pages, softcover
