Description

Exhaust air filtration and condensate activation for model series: HX During the heating phase in combination with sterilization of the condensate for infectious material, including 0.2 µm filter. During sterilization, condensate is collected in the chamber. Condensate and filter are sterilized in-line (temperature control in the filter). For Systec HX-210 to Systec HX-1580.

Additional Information

No.	SX-0502
Manufacturer (Brand)	Systec
EAN	4066292564404
Transport temperature	Room temperature
