Shipping

Product Images

Description

The hydrophilic qpore membrane filters made of pure cellulose acetate CA belong to the filters with very low binding properties. These filters allow high filtration volumes and thus reduce necessary filter changes. CA membrane filters are excellent for filtration of proteins and enzymes, sterile filtration of cell culture media and other applications, i.e. wherever the preservation of the original protein composition and concentration is important.

Additional Information

No.	6-0083
Manufacturer (Brand)	qpore
EAN	4058072183882
Transport temperature	Room temperature
diameter	47 mm
sterile	No
Fluid behavior	hydrophilic
Material membrane	Cellulose acetate (CA)
Pore size	0.45 µm
