qpore® syringe filter made of PES, sterile, 0.10 µm, Ø 25 mm, 100 pcs/pack

€149.00 plus VAT & Shipping

Product Images

Description

qpore® offers a comprehensive range of high quality syringe filters for various filtration applications in your laboratory. All filters are manufactured under the highest quality standards from the best raw materials.

This sterile qpore® syringe filter has a hydrophilic membrane made of PES with high mechanical and chemical resistance and minimal protein absorption. An excellent flow rate makes it optimal for sterile filtration, clear filtration and cell removal under sterile conditions. The effective filtration area of this syringe filter is 4.08 cm². The sturdy polypropylene filter housing is pressure resistant up to a maximum of 5.0 bar allowing for rapid filtration.

Features:
- Membrane diameter 25 mm
- Low dead volume
- Stable at pH 1-14
- DNA-, DNase-, RNase-, Pyrogen-free
- Luer connections: Luer lock female, Luer cone male
- No risk of confusion due to labeling (membrane type, pore size)
- The syringe filters are individually sterile packed in units of 100

Additional Information

No.	6-0043
Manufacturer (Brand)	qpore
EAN	4058072172039
Transport temperature	Room temperature
Color	White
Material	Polypropylene (PP)
sterile	Yes
suitable for	Syringes
DM outside	25 mm
TBST MAX	90 °C
Filter properties	suitable for HPLC|single packed
MAX operating pressure	5 bar abs.
Fluid behavior	hydrophilic
Material housing	Polypropylene (PP)
Material membrane	Polyethersulfone (PES)
Pore size	0.10 µm
Type Connection Output	Luer cone male
Type Connection Input	Luer lock female
Area diaphragm	3.9 cm2
Type filter	Syringe pre-filter
for medium	Liquids
