**qpore® syringe filter made of PTFE, non-sterile,  
0.22 µm, Ø 17 mm, 100 pcs/pack**

**€99.00  
plus VAT &  
Shipping**

## Product Images

## Description

---

**qpore®** offers a comprehensive range of high quality syringe filters for various filtration applications in your laboratory. All filters are manufactured under the highest quality standards from the best raw materials.

This **non-sterile qpore® syringe filter** has a membrane made of **PTFE** with a high resistance to solvents, acids and bases. Thus, this syringe prefilter can be used wherever application or clear filtration is allowed under non-sterile conditions, as mostly in sample preparation prior to HPLC or GC. **Prefilter made of glass fiber included.** For filtration of hydrophilic solutions, pre-rinsing with a solvent is necessary to make the hydrophobic membrane permeable to aqueous solutions. The sturdy filter housing made of polypropylene is pressure resistant up to a maximum of 6.0 bar which allows fast filtration.

Features:

- Low dead volume
- Stable at pH 1-14
- Luer connections: Luer lock female, Luer cone male
- No risk of mix-up due to labeling (membrane type, pore size)
- The syringe filters are packed non-sterile 100 pieces in a bag

## Additional Information

No.	6-0020
Manufacturer (Brand)	qpore
EAN	4058072174682
Transport temperature	Room temperature
Color	red
Material	Polypropylene (PP)
sterile	No
suitable for	Syringes
Filter properties	suitable for HPLC hydrophobic
MAX operating pressure	5 bar abs.
DM outside	17 mm
Area diaphragm	2 cm <sup>2</sup>
Fluid behavior	hydrophobic
Material housing	Polypropylene (PP)
Material membrane	Polytetrafluoroethylene (PTFE)
Pore size	0.22 µm
TBST MAX	100 °C
Type Connection Output	Luer cone male
Type Connection Input	Luer lock female
Type filter	Syringe pre-filter
for medium	Liquids
