**qpore® syringe filter made of PTFE, non-sterile,  
0.45 µm, Ø 13 mm, 100 pcs/pack**

**€99.00  
plus VAT &  
Shipping**

## Product Images

## Description

---

**qpore®** offers a comprehensive range of high quality syringe filters for various filtration applications in your laboratory. All filters are manufactured under the highest quality standards from the best raw materials.

This **non-sterile qpore® syringe filter** has a membrane made of **PTFE** with a high resistance to solvents, acids and bases. Thus, this syringe prefilter can be used wherever application or clear filtration is allowed under non-sterile conditions, as mostly in sample preparation prior to HPLC or GC. **Prefilter made of glass fiber included.** For filtration of hydrophilic solutions, pre-rinsing with a solvent is necessary to make the hydrophobic membrane permeable to aqueous solutions. The sturdy filter housing made of polypropylene is pressure resistant up to a maximum of 6.0 bar which allows fast filtration.

Features:

- Low dead volume
- Stable at pH 1-14
- Luer connections: Luer lock female, Luer cone male
- No risk of mix-up due to labeling (membrane type, pore size)
- The syringe filters are packed non-sterile 100 pieces in a bag

## Additional Information

No.	6-0024
Manufacturer (Brand)	qpore
EAN	4058072173326
Transport temperature	Room temperature
Color	red
Material	Polypropylene (PP)
sterile	No
suitable for	Syringes
DM outside	13 mm
TBST MAX	100 °C
Filter properties	suitable for HPLC hydrophilic
MAX operating pressure	3.4 bar abs.
Fluid behavior	hydrophilic
Material housing	Polypropylene (PP)
Material membrane	Polytetrafluoroethylene (PTFE)
Pore size	0.45 µm
Type Connection Output	Luer cone male
Type Connection Input	Luer lock female
Area diaphragm	0.65 cm <sup>2</sup>
Type filter	Syringe pre-filter
for medium	Liquids
