neolab® Chempump bottle with dosing device, 170 ml

€57.10
plus VAT &
Shipping

Product Images

Description

For fine and targeted dosing of many liquids, e.g. oils and gasoline, especially for wetting cleaning cloths with alcohols. With a slight pressure on the chrome-plated metal cap, a dosing device is activated which directly wets the absorbent cloth. The delivery tube brings even the last residue to light. When not in use, the bottle is hermetically sealed so that even volatile substances do not escape.

Additional Information

No.	1-7236
