Description

Eppendorf Deepwell Plates 96 and 384 are high-performance plates for all manual and automated applications - from sample storage at -86 °C to DNA denaturation at 100 °C. Made of pure polypropylene (PP), the plates offer innovative features: More reliability. More efficiency. More stability. Plates are available with a white, yellow, green or blue rim. High-contrast alphanumeric labeling is laser-engraved into the rim for easy identification of wells. Find your sample up to 30% faster and reduce pipetting errors with this OptiTrack® matrix. With all their thoughtful features, these plates set new standards in the lab.
