Description

For serum-reduced cultivation of cells.

- For the cultivation of fastidious cell lines.
- In addition to chemical groups such as carboxyl and hydroxyl groups, free amino groups are formed on the surface.
- Surface thus shows a protein-like structure, cells can attach and spread directly.
- Cells adhere faster, yield is higher.
- Sensitive cell lines can also be cultivated.
- Suitable for serum-reduced cultivation of cells.
- Clearly distinguishable by color code: orange, embossed alphanumeric coding on 96-well standard plates.
- Free of endotoxins, DNase, DNA, RNase, non-cytotoxic.

Additional Information

No.	BN-2372
Manufacturer (Brand)	Brand
old neoLab article no.	7-5366
EAN	4058072215798
Transport temperature	Room temperature
autoclavable at 121°C	No
Color	Black
Material	Polystyrene (PS)
Volume	330 µl
sterile	Yes
Multi-hard disk features	individually packed alphanumerically coded RNase-free DNase-free DNA-free
Number of cavities	96
suitable for cooling in	Refrigerator freezer/ freezer
Shape floor	F shape (flat)
Shape cavities	around
Type plate	Microtiter plate
Type frame MTP	without frame
